Norway**

Optigen Accession #: **15-5850**  
Report issued for: **DeDe**

*OptiGen Test Certificate*

**Optigen Accession #: 15-5850**

**Test Completed: 07/23/2015  
Report Issued: 07/23/2015**

Test Performed: **prcd Mutation Test for PRA**

Result: **Normal**  
Sample Type: **Blood**

Registered Name: **Bell La Vie Von Shinbashi**

Reg#: **VDH/CERCC4707/13**

Breed: **Chinese Crested**

ID#: **276093400297889**

Sex: **Female**

Date of Birth: **February 20, 2013**

Owner(s):

**Eva Carina ECK Kristiansen  
Heidi HS Strand  
Tone TS Strand**

*Susan Pearson Kelling*

**Test Results:** Genotype of your dog is **NORMAL/CLEAR**.

**Risk for developing prcd-PRA:** This dog will never develop the prcd form of PRA (progressive rod-cone degeneration form of Progressive Retinal Atrophy). Note that PRA in Chinese Cresteds appears to consist of at least two different genetic defects. Because only a small number of PRA affected Chinese Cresteds have been tested so far, it is not possible to estimate the frequency of prcd-PRA among PRA affecteds of this breed. A Chinese Crested of known status for prcd-PRA could still be at risk for another, as yet unidentified form of PRA.

**Significance for breeding:** Genetically Normal/Clear dogs can be bred to any dog and will produce no pups affected with the prcd form of PRA.

This interpretation is based on the test result of the DNA test for the specific mutation identified as causing the prcd form of PRA in Chinese Cresteds as of the date on this report.

For further information, please consult the OptiGen website at [www.optigen.com](http://www.optigen.com). Note: The use of this test is patent protected and licensed to OptiGen. See [http://www.optigen.com/opt9\\_patent.html](http://www.optigen.com/opt9_patent.html) for details.
